

Remote Hands & Professional Services

We live and breathe infrastructure so you don't have to. It's our passion. It's our life's work.

For over 14 years, industry-leading companies have put their trust in ServerCentral to design and manage their mission-critical infrastructure.

Whether it's Colocation, Dedicated Infrastructure, Managed Services, Public, Private, or Hybrid Cloud/Virtualized solutions, we believe there is one right answer for your infrastructure: your answer.

To support these infrastructure services we provide our customers with 24/7/365 hands on, onsite support by sys admin-level technicians. ServerCentral customers always talk to an expert that can solve your problem - not a customer service representative.

We take support very seriously: Our average support ticket response time is 15 minutes or less in our Chicago-area facilities.

To further assist our customers, we offer a wide range of services including:

Remote Hands

- Operating system installation
- Server installation
- Remote server reboot
- Console remote reboot with disk check, up to 30 min.
- Physical server reboot
- Drive replacement
- Memory installation
- Physical hardware replacement
- Quick network reconfiguration
- Cabinet installation
- Cabinet visual inspection
- Infrastructure inventory report (CPE)
- Infrastructure inventory report (SCP)
- Shipping / receiving (including packing and unpacking)
- Carrier cross connect installation
- Infrastructure cross connect installation
- Cloud cross connect
- Cable management guides / maps
- Cable labeling
- Biometric security installation
- Drive destruction
- Circuit performance testing
- KVM configuration
- KVM installation
- PDU installation
- PDU testing
- PDU replacement
- Tape swap

Data Center Migrations

- Asset inventory
- Migration project planning
- Migration project management
- Physically execute data center migrations

Audit/Compliance Support

- SSAE-16 SOC 1/ISAE 3402
- AT-101 SOC 2 and SOC 3
- PCI DSS
- HIPAA
- Corporate risk management
- Insurance surveys

Infrastructure Design

- Network core design
- Network core development
- Network core implementation
- Network core management & administration
- Rack layout design / elevations
- Cabinet layout design / elevations
- Structured cabling design
- Structured cabling implementation

Systems Admin

- Administrator password resets
- Storage system design (SAN)
- Storage system setup (SAN)
- Storage system management & administration (SAN)
- Storage system design (NAS)
- Storage system setup (NAS)
- Storage system management & administration (NAS)
- Storage system design (DAS)
- Storage system setup (DAS)
- Storage system management & administration (DAS)
- Firewall installation
- Firewall configuration
- Firewall management & administration
- Load balancer installation
- Load balancer configuration
- Load balancer management & administration
- Backup system design
- Backup system setup
- Backup system management & administration
- Advanced system monitoring

Network Engineering

- Network architecture design
- Network architecture development
- Network architecture implementation
- Network architecture management & administration
- VLAN design
- VLAN development
- VLAN implementation
- VLAN management & administration
- Switch installation
- Switch configuration
- Switch management & administration
- Router installation
- Router configuration
- Router management & administration
- Network protection design
- Network protection development
- Network protection implementation
- Network protection management & administration
- BGP community assignments
- BGP community management & administration
- DDoS mitigation services (network)
- DDoS mitigation services (applications)
- Network migration project planning
- Network migration project management
- Physically execute network migrations
- DWDM network design
- DWDM network management & administration

Pricing

Remote Hands Pricing*:

15 minutes	\$50
30 minutes	\$100
45 minutes	\$150
1 hour	\$200

* Multiple hour and monthly remote hands blocks are also available.

Data center migrations, audit/compliance engagements, infrastructure design, systems administration and network engineering pricing is provided on an individual case basis. This enables us to provide our customers with accurate upfront pricing directly in-line with the desired scope of the request/project.
